

Warning Signs of Heart Attack

COMMON SIGNS

Pressure, fullness, squeezing or pain in the center of the chest that lasts more than a few minutes

Chest pain that spreads to the shoulders, neck or arms

Chest discomfort with lightheadedness, fainting, sweating, nausea or shortness of breath

**Heart Attack is an emergency.
Know the signs and act quickly.
It could save your life!**

Other warning signs include unusual chest, stomach or abdominal pain; nausea, dizziness or difficulty breathing without chest pain; unexplained weakness, anxiety or fatigue; and heart palpitations, cold sweat or paleness.

Not all of these signs occur in every attack. If you or someone you know experience all or some symptoms, get help fast! Call 911 immediately.

To Lower Your Risk of Heart Attack

- ♥ **Quit smoking**
- ♥ **Check your blood pressure & cholesterol regularly**
- ♥ **Eat a low-fat diet**
- ♥ **Be physically active**
- ♥ **Avoid excessive alcohol consumption**
- ♥ **Control diabetes**
